

Scenario Management

"Scenarios stretch our thinking and help us make crucial choices in times of uncertainty and change."
Website SHELL

Every effective entrepreneur, manager or professional thinks in scenarios. You can't predict the future, but you can be well prepared for what's to come.

In this training you will step by step map out a number of scenarios and see what consequences they have. Not a prediction but an exploration of what might happen. By doing this you will be able to recognize relevant signals faster and to take appropriate measures at an earlier stage.

In this module we define trends in your business/industry. Then we cluster them. We look at the predictability and impact of each cluster. The next step is to develop (action-) plans for the scenario or scenarios who have the greatest impact and lowest predictability.

YES Human Factors Ltd does this with the help of very experienced trainers and teachers with a background in management (operational and HR), psychology, organizational development and change management. The practical experience of dozens of years comes from different organizations, such as Siemens, Royal Air Force, KLM, Martinair, Ministry of the Interior, police etc.

YES Human Factors Ltd provides training within the market segments: hospitals, coastguard, process industry, IT, safety regions, banks and aviation.

We kindly invite you to participate in this interactive, practical and inspiring program.

Han van der Meer and Jean-Pierre Kahlmann,
Partners YES Human Factors Ltd

Scenario Management

Scenario Management is specially developed for professionals and managers who want to grow in their organization and contributes to a safe, effective and efficient working environment.

Description

The training provides insights but also tools for the development of scenarios. After this training you will be better prepared for what the future will bring and you will be able to adjust quickly and effectively.
