

Threat and Error Management

When assessing risks, we often turn to models that map those risks in an analytical and structured way. This is sensible, because it gives a good picture of possible threats and the possible consequences and you can take measures in advance to prevent a catastrophe or, at least, limit the damage. But is it enough? People are irrational beings who, when assessing risks, are guided by their state of mind and/or striking examples and fear of the unknown.

The feeling of “being in control” control is in itself healthy. It gets us out of bed in the morning and into action.

However, it can also contribute to self-overestimation and risky behaviour that is not always effective in the environment and situation in which you find yourself.

In this training you learn to rationally assess threats and risks and to influence (too) risky behaviour in the right way, so that everyone can go home healthy at the end of the working day.

YES Human Factors Ltd does this with the help of very experienced trainers and teachers with a background in management (operational and HR), psychology, organizational development and change management. The practical experience comes from different organizations, like Siemens, Royal Air Force, KLM, Martinair, Ministry of the Interior, police etc.

YES Human Factors Ltd provides training within the market segments: Health Care (hospitals), coastguard, process industry, IT, safety regions, banks and aviation.

We kindly invite you to participate in this interactive, practical and inspiring program.

Han van der Meer and Jean-Pierre Kahlmann,
Partners YES Human Factors Ltd

Threat and Error Management

Threat and Risk Management is specially developed for professionals and managers who want to grow in their organisation and contributes to a safe, effective and efficient working environment.

Description

The training provides insights but also handles rational and irrational behaviour of yourself, your team and your organization.
